Personal Statement:

I am a versatile web developer with a passion for both front-end and back-end development. My expertise includes HTML, CSS, JavaScript, React, NodeJS, and extensive experience in PHP and Laravel, allowing me to create robust and scalable applications. I am well-versed in database management, working proficiently with both MySQL for relational databases and MongoDB for NoSQL solutions.

As a fluent speaker of four languages, I excel at breaking down complex concepts and communicating them clearly and effectively, making me a strong collaborator in any team. I am committed to continuous learning, staying updated on the latest industry trends to deliver cutting-edge solutions. I thrive on creating high-quality work and always aim to exceed expectations. I am confident that my dedication, adaptability, and technical expertise make me an excellent fit for teams that value innovation and excellence in web development

Technical Skills:

Languages: HTML, CSS, Javascript, PHP, NodeJS.

Frameworks and Libraries: React, Laravel, Tailwind CSS

Databases: MySQL, MongoDB.

Development Practices: Responsive Design, RESTful Services, CRUD Operations.

Tools and Platforms: Git, GitHub, Postman, NPM, Artisan, MySQL Workbench

Specializations:

Frontend Development: Building dynamic, interactive user interfaces using React and Tailwind CSS, with a strong understanding of HTML and CSS for layout and design.

Backend Development: Proficient in Node.js and PHP for server-side logic; experienced in integrating databases using MySQL and MongoDB for data storage and retrieval.

API Development: Designing and implementing RESTful APIs, capable of handling CRUD operations efficiently across different web applications.

Project Experience:

Project Management App: A full-featured Laravel app for managing projects, tasks, clients, and users. Includes secure role-based authentication (Admin/User), project and task management, client association, and user profile management. Built with a clean, responsive UI using Tailwind CSS.

Technologies: Laravel, Tailwind CSS, MySQL, Blade, GitHub Actions

Dog Photo App: A React-based application allowing users to fetch random dog photos and save favorites in local storage. Features a responsive design and seamless interaction with The Dog API, with toast notifications for user feedback.

Technologies: React, Axios, React Toastify, CSS
